

LUIS ALVAREZ

@ laar0716@outlook.com |  LinkedIn |  GitHub |  Portfolio |  San Pedro Sula, Honduras

EDUCATION

European University of Madrid <i>Master of Science in Big Data Analytics</i>	Madrid, Spain <i>Nov 2024 – Present</i>
Next Educación <i>Master in Big Data and Business Intelligence</i>	Madrid, Spain <i>Oct 2022 – Jun 2023</i>
Central American Technological University (UNITEC) <i>Bachelor of Science in Computer Systems Engineering</i> Internship: <i>Software Developer at HeroUnit</i>	San Pedro Sula, Honduras <i>Jan 2015 – Dec 2020</i> <i>Oct 2019 – Mar 2020</i>

SKILLS

Languages: TypeScript, JavaScript, C#, SQL
Technologies: React.js, Node.js, NestJS, Next.js, .NET, React Native, Expo, Firebase, PostgreSQL, MySQL, OAuth, TailwindCSS, Material UI
Tools: Git, Figma, Trello, Postman, VS Code, Jest
Methodologies: Agile, Scrum, Kanban

EXPERIENCE

Acklen Avenue <i>Full Stack Software Developer</i>	Remote <i>Nov 2020 – Jul 2025</i>
- Built secure applications using Firebase and OAuth, designing REST APIs and database schemas focused on reliability and performance. - Developed frontend interfaces with React.js and TailwindCSS, creating reusable components and improving user experience. - Improved code reliability by implementing unit and integration tests with Jest, reducing production regressions.	
HeroUnit <i>Software Developer</i>	Remote <i>Mar 2020 – Nov 2020</i>
- Refactored a legacy JavaScript codebase to improve maintainability and readability. - Redesigned UI components using React.js and Material UI, improving responsiveness and accessibility. - Implemented reusable frontend components and consistent styling to accelerate feature development.	

PROJECTS

Markdown Live Editor <i>Next.js, React, TypeScript, TailwindCSS</i>	2026
- Built a responsive Markdown editor with live preview, synchronized scrolling, and rich formatting toolbar (headings, lists, code, tables). - Implemented syntax highlighting, real-time metrics (word/char count), and undo/redo using ReactMarkdown and remark-gfm.	
Mobile Data Collection App <i>React Native, NestJS, PostgreSQL, Firebase, GCP</i>	2025
- Developed a cross-platform mobile app for field data collection, including photo capture and structured form submission. - Designed a scalable backend with NestJS, Firebase Auth, and GCP storage, persisting metadata in PostgreSQL.	
Staff Training Evaluation App <i>React, TypeScript, .NET, PostgreSQL</i>	2024
- Built a full-stack system for evaluating healthcare training programs with dynamic, reusable forms. - Implemented a .NET backend for validation, API integrations, and secure storage of evaluations and attachments.
